

Turn-N-Count

Ratcheting "T" Wrench

With Built-in Revolution Counter

Introducing **"Turn-N-Count"** a versatile lightweight ratcheting "T" wrench. Designed to turn Utility Valves and Fire Hydrants of all types and sizes.

Similar to a conventional "T" handle in appearance only, **"Turn-N-Count"** integrates a ratcheting mechanism and digital counter into its ergonomic design. The ratchet significantly reduces back strain by reducing the range of motion necessary to operate the tool. The operator can reverse rotation with a quick turn of the directional lever.

One person operation is easy and comfortable; the revolution counter lets the operator concentrate on safety while **"Turn-N-Count"** tracks the valve position.

The lightweight "Telescoping key" adjusts quickly, allowing the operator to set the height for safe and comfortable operation. The key is removable from the drive head and will receive any standard 1" square stud or adapter for special nuts.

"Turn-N-Count" handles tough to access valves easily. By removing one handle the operator can work next to walls, fences and other obstructions without having to reset the key on the nut. All of these features packed into a tool no larger or heavier than those "T,s" you may currently be using.

LIGHTWEIGHT....EASY ONE PERSON OPERATION

QUICK-CHANGE RATCHET

LCD REVOLUTION COUNTER

TELESCOPING KEY

REMOVEABLE HANDLE

TURN-N-COUNT Ratcheting "t" Wrench

Quick lock telescoping key adjustment.

Accommodates all boxes, vaults and valves.
