DESCRIPTION

E.H. Wachs family of portable Guillotine® reciprocating saws are designed to cold cut 2” through 32” (DN50-800) pipe, conductors, structures and solids such as beams, bar stock and rails. The four Guillotine models available from smallest to largest are the Super C, Model D, Super D and Goliath®. They provide fast, accurate cutting for contractors, water departments, gas companies, refineries, petrochemical and processing plants, and anywhere a fast simple cut is needed. In use virtually everywhere, they’re strong yet light, simple to mount, simple to operate and simply bulletproof.

The Guillotine’s rugged steel and aluminum construction is designed to deliver years of trouble free, reliable service. All Guillotines use an orbital cutting motion that lifts the blade on the return stroke, dramatically extending blade life. And when the cutting blades finally do need changing, they’re easily replaced. Since its introduction in 1953 E.H. Wachs Guillotines have remained the benchmark in industrial grade reciprocating saws. It’s no wonder that when pipe saws are first mentioned, the “Wachs Saw” is mentioned first.

EASY SETUP & OPERATION

Wachs Guillotine saws set up quickly, using a positive chain mounting system with a machined cast iron "V" saddle for perfectly square cuts. They can be mounted horizontally, vertically or anywhere in between, and come standard with finger-tip feed control for ease of operation. The saws require minimal operating clearances, in fact as little as 2.5” (63.5mm) to one side of a Super C.

Available with pneumatic and hydraulic drive motor options, select Guillotine models including the Goliath can be optionally equipped with autofeed or autoclamping mechanisms (with Rapid Retract), or with both. This allows the machine to be remotely controlled from a distance via Wachs Manifolds or by the UCP-3 Universal Control Panel that controls the feed rate, the cutting speed and the clamping hydraulics.

HIGHLY VERSATILE

No matter which Guillotine pipe saw you select, you’re acquiring the most versatile reciprocating saw on the market today. With the power to saw through most materials, and the ability to be easily modified for unusual, difficult or dangerous cutting operations, there’s a Guillotine right for you. From simple to difficult, pipe to solids, carbon to stainless, safe to hazardous, above water or below, whatever the cutting task Wachs has a Guillotine pipe saw for the job.

FEATURES

• Rugged yet compact design requires minimal clearances
• Four models cut from 2” to 32” (DN50-800)
• Easy fingertip feed control, quick change blades
• Fast setup and cutting, both horizontally and vertically
• Pneumatic and hydraulic drive options
• Optional autofeed and autoclamping on select models

Guillotine saws feature fast, easy operation and the ability to cut most materials

Quickly cuts through pipe with an orbital cutting motion that extends blade life

Guillotine saw shown with custom saddle for cutting steel I-beams, others available

SPECIFICATIONS

Drive Options:
Pneumatic and Hydraulic Electric Drive Available by Special Order

Power Requirements:
Pneumatic: 50 cfm @ 85 psi (1.4m³/min @ 5.9 bar)
Hydraulic: 10 gpm @ 1500 psi (38 lpm @ 106 bar)
Hydraulic Goliath: 15 gpm @ 1500 psi (57 lpm @ 106 bar)

Machine Capacity:
Cold cutting of pipe from 2” through 32” (DN50-800) plus conductors, structure and solids, varies by model

Installation Method:
Standard cast iron V saddle and mounting chain, optional autoclamping on select models, custom mounting saddles for non circular shapes such as squares and I-beams

Controls:

Lubrication:
Grease fittings at all wear points.

Finish:
Polished metal & Safety Yellow epoxy

STANDARD EQUIPMENT

• 1 saw blade
• 1 ¼” wrench
• Air lubricator and filter (Pneumatic)
• Steel storage case (Super C only)
• Lifting eyes
• Mounting chains

OPTIONAL EQUIPMENT

• General purpose & heavy duty blades
• Custom Mounting Saddles
• Autofeed
• Autoclamp with Rapid Retract
• Hydraulic Manifold
• Universal Control Panel (UCP 3)
• HPU Hydraulic Power Unit

WARRANTY

E.H. Wachs machine tools and their associated parts are warranted against defects in materials and workmanship for a period of twelve months from the date of purchase. E.H. Wachs expressly reserves the right to repair or replace only those parts which prove to have been defective at the time of purchase. This warranty becomes void if maximum flow and pressure ratings are exceeded.
